CoachLife - New Session Generation & Pending Flow

Goal

The system should **never block a batch** because one or more students missed previous sessions.

Admin controls **session generation**.

Coach controls **attendance and teaching**.

Pending sessions become the coach's responsibility and can be completed at any time.

Core Principles

Admin Responsibilities

- Create Batch
- Manage Batch
- Generate Session Cards
- View Progress

Coach Responsibilities

- Start Class
- Mark Attendance
- Teach Students
- Complete Pending Sessions

System Responsibilities

- Track Session Progress
 - Track Attendance
 - Maintain Pending Queue
 - Preserve Learning Order
-

Session Status

Status	Meaning
Upcoming	Session generated and waiting to start

Status	Meaning
In Progress	Coach started teaching
Completed	Session finished successfully
Pending	Session was missed or not completed

Attendance Status

Status	Meaning
Present	Student attended
Absent	Student absent
Late	Student joined late
Excused	Approved leave

Attendance and Session Status are independent.

Example

Attendance = Absent

Session Status = Pending

New Batch Flow

Admin

↓

Create Batch

↓

Assign

- Students
- Coach
- Learning Pathway
- Schedule

↓

Save Batch

Session Generation Flow

Admin opens Batch

Batch A

Current Session : 5

↓

Generate Session

For every active student

Generate Session Card

Session = 5

Status = Upcoming

If the student already has an Upcoming or In Progress session

Convert previous session

↓

Pending

↓

Generate new session

This ensures session generation is never blocked.

Coach Class Flow

Coach Dashboard

Today's Classes

↓

Select Batch

↓

Start Class

Coach does NOT generate session cards.

Attendance Flow

Coach marks attendance.

John

Present

✓

David

Absent

✓

Attendance is saved immediately.

Teaching Flow

Coach opens each student's generated session card.

Upcoming

↓

Start

↓

In Progress

↓

Complete

↓

Completed

Absent Student Flow

Student is absent.

Attendance

Absent

Session card automatically becomes

Pending

No deletion.

No regeneration.

No blocking.

Next Session Generation

Next week

Admin clicks

Generate Session

System checks previous session.

Case 1

Previous session completed

Session 5

Completed

↓

Generate Session 6

Case 2

Previous session pending

Session 5

Pending

↓

Generate Session 6

↓

Session 5 remains Pending

Generation continues.

Batch is never blocked.

Pending Queue

Every Pending session appears inside Coach Dashboard.

Pending Sessions

Batch A

John

Session 4

Pending

David

Session 2

Pending

Arun

Session 5

Pending

Coach can open any pending session.

Pending

↓

Teach Student

↓

Complete Session

↓

Completed

Multiple Pending Sessions

A student can have multiple pending sessions.

Example

John

Session 2

Pending

Session 3

Pending

Session 4

Upcoming

Coach should complete the oldest pending session first.

Pending Queue should always be sorted by

Oldest Session

↓

Newest Session

Batch Progress

Batch progression is independent from student completion.

Example

Week 1

Batch Session 1

↓

Week 2

Batch Session 2

↓

Week 3

Batch Session 3

↓

Week 4

Batch Session 4

Even if students have pending sessions, the batch continues.

Student Timeline Example

Student A

Session 1

Completed

↓

Session 2

Completed

↓

Session 3

Completed

Student B

Session 1

Pending

↓

Session 2

Upcoming

↓

Session 3

Upcoming

Coach later completes

Session 1

↓

Completed

Student history remains intact.

Dashboard Changes

Batch Details

Admin Batch Page

Display

Current Batch Session

Total Students

Upcoming

Completed

Pending

Generation Rules

When Admin clicks Generate Session

For each active student

↓

If previous session is Completed

Generate next session

↓

If previous session is Pending

Keep previous Pending

Generate next session

↓

If previous session is In Progress

Convert it to Pending

Generate next session

↓

If previous session is Upcoming

Convert it to Pending

Generate next session

Generation never fails because of unfinished sessions.

Final Workflow

├─ Assign Students

|

├─ Generate Session Cards

|

▼

Coach

|

├─ Start Class

|

├─ Mark Attendance

|

├─ Teach Present Students

|

├─ Complete Sessions

|

├─ Pending Sessions move to Pending Queue

|

▼

Admin

|

├─ Generate Next Session

|

├─ Previous Pending Sessions remain Pending

|

├─ New Session Cards generated for everyone

|

▼

Coach

|

├─ Continue Regular Classes

|

├─ Complete Pending Sessions anytime from Pending Queue

Benefits

- Batch progression is never blocked.
- Admin controls only session generation.
- Coach focuses only on teaching and attendance.
- Students never lose missed sessions.
- Multiple pending sessions are supported.

- Every session remains available until completed.
- Learning history is fully preserved.
- The system scales cleanly for large batches.
